

Covered warehouse

In order to meet its customers' requirements, OVET is equipped with covered storage space in Vlissingen, including 6 separate and fully ventilated compartments to store products requiring dry storage. Given that the warehouse is GMP certified, the warehouse can handle various types of dry bulk and break bulk, such as biomass, minerals, steel coils and even agricultural products.

Fossil fuels, agribulk, aggregates, minerals, GMP

Dry bulk

Ovet offers great flexibility, not only in its services, but also in its methods of handling various types of products. Besides fossil fuels, such as coal, anthracite, petcoke and coke, OVET also specialises in the handling of agribulk, aggregates, minerals and GMP-classified products.
